

DJANDAK Delivery Team
Capability Statement

**Delivering end-to-end design
and construction projects**

About our Delivery Team

When you engage DJANDAK you help keep **Djandak** (Dja Dja Wurrung Country) healthy and support **Djaara** (Dja Dja Wurrung People) to thrive

We heal Country

galk-galk dhelkunya
to care for, to heal,
many trees

Djaara (Dja Dja Wurrung People) have lived on **Djandak** (Dja Dja Wurrung Country) for tens of thousands of years. The Delivery team puts **Djaara's** understanding of **Djandak** (Dja Dja Wurrung Country) at the centre of what we do. **Djaara** People have thousands of years of traditional ecological knowledge and land management skills that we bring to our projects so that the whole community can benefit and connect to our culture.

The Delivery team comprises many skillsets and functions including construction, natural resource management, forestry and fire, waterway conservation, land remediation and landscape construction, landscape maintenance and more. Our crew members have a diverse set of skills, professional qualifications, training and lived experience. Safety is always a central focus of our work, for the community and for our staff and contractors. We use SiteDocs Safety Systems to manage and monitor our safety practices.

We are committed to empowering **Djaara** people on their path to self-determination. It matters to us that **Djaara** expertise and culture is shared and one way we measure success is if we achieve the following outcomes:

- **Djaara** people are employed to work on projects on their Country.
- **Djaara** see culture reflected back to them in the cities, towns, landscapes and the natural environment of this region.
- Government, business and local communities experience **Djaara** culture in civic buildings and shared natural spaces like parks, forests and city gardens.
- Major projects demonstrate cultural sensitivity, and are delivered within budget, and on time.

Womindjika Welcome

As the delivery arm of DJANDAK, we partner with your organisation to offer a range of environmental and construction services to make your projects a success.

We have the capability and capacity to deliver on your large-scale projects. Where we differ from other construction or land management contractors however, is that we represent, support and employ **Djaara** People, the Traditional Owners of Central Victoria; we embed **Djaara** cultural values into our work.

We provide fixed quotes and ongoing service arrangements to build, modify and manage landscapes. Talk to our team about how we can partner on your next big project.

Contact us for a quote or a yarn today.

Our Capacity to Deliver for you

Our Team and How We Work

Our team includes Rangers, Crew Leaders, Heavy Machinery Operators. We have a rotating crew with specialties in NRM, Construction, Forestry and Fire.

We work with other DJANDAK Program areas including Djaara Centred Design, Land Management, Bioculture (Biodiversity & Culture) and Gatjin (Water) to develop a holistic approach to your project. We will put a team together to best serve your project.

All projects are quoted individually and may include labour, plant & equipment, travel, materials, installation costs, underground service checks and other costs depending on the project.

We have a range of additional plant and equipment and can hire specialist equipment if needed for your job.

Plant and equipment is available at hourly and daily rates excluding GST.

Contact DJANDAK for all project enquiries and work requests

or email djandak@djadjawurrung.com.au
